

EYFS ELG	The Natural World ELG - Explore the natural world around them, making observations and drawing pictures of animals and plants; - Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class; - Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter.					
	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Working Scientifically	Pupils will be taught to use the following practical scientific methods, processes and skills: KS1a asking simple questions and recognising that they can be answered in different ways KS1b observing closely, using simple equipment and measurement KS1c performing simple tests KS1d identifying and classifying KS1e using their observations and ideas to suggest answers to questions KS1f gathering, recording and communicating data and findings to help in answering questions. KS1g begin to notice patterns and relationships. KS1h use scientific language and read and spell age-appropriate scientific vocabulary		Pupils will be taught to use the following practical scientific methods, processes and skills: LKS2a making decisions, asking relevant questions and using different types of scientific enquiries to answer them LKS2b making systematic and careful observations using notes and simple tables LKS2c setting up simple practical enquiries, comparative and fair tests LKS2d taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers LKS2e gathering, recording, classifying and presenting data in a variety of ways to help in answering questions LKS2f recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables LKS2g reporting on findings from enquiries, using relevant scientific language, including oral and written explanations, displays or presentations of results and conclusions LKS2h using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions. LKS2i identifying differences, patterns, similarities or changes related to simple scientific ideas and processes. Begin to look for naturally occurring patterns and relationships LKS2j using straightforward scientific evidence to answer questions or to support their findings. LKS2k recognise when and how secondary sources might help them to answer questions that cannot be answered through practical investigations.		Pupils will be taught to use the following practical scientific methods, processes and skills: UKS2a planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary UKS2b taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate UKS2c using test results to make predictions to set up further comparative and fair tests UKS2d recording data and results of increasing complexity UKS2e reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations UKS2f reporting and presenting findings using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs UKS2g identifying scientific evidence that has been used to support or refute ideas or arguments. UKS2h draw conclusions based on their data and observations, use evidence to justify their ideas, and use their scientific knowledge and understanding to explain their findings. UKS2i explore and talk about their ideas; asking their own questions about scientific phenomena; and analysing functions, relationships and interactions more systematically. UKS2j recognise that scientific ideas change and develop over time. UKS2k Pupils should read, spell and pronounce scientific vocabulary correctly.	

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Animals (Including humans)	A1a Identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals. A1b Identify and name a variety of common animals that are carnivores, herbivores and omnivores A1c Describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets) A1d Identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense.	A2a Notice that animals, including humans, have offspring which grow into adults. A2b Find out about and describe the basic needs of animals, including humans, for survival (water, food and air). A2c Describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene.	A3a Identify that animals, including humans, need the right types and amount of nutrition. A3b Identify that animals, including humans cannot make their own food; they get nutrition from what they eat. A3c Identify that humans and some animals have skeletons and muscles for support, protection and movement.	A4a Describe the simple functions of the basic parts of the digestive system in humans. A4b Identify the different types of teeth in humans and their simple functions. A4c Construct and interpret a variety of food chains, identifying producers, predators and prey.	A5a Describe the changes as humans develop to old age. A5b Draw a timeline to indicate stages in the growth and development of humans. A5c Learn about the changes experienced in puberty.	A6a Identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood. A6b Recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function. A6c Describe the ways in which nutrients and water are transported within animals, including humans. Explore questions to understand how the circulatory system enables the body to function. A6d learn how to keep their bodies healthy and how their bodies might be damaged – including how some drugs and other substances can be harmful to the human body. A6e Explore the work of scientists and scientific research about the relationship between diet, exercise, drugs, lifestyle and health.

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Living things and their habitats		LT2a Explore and compare the differences between things that are living, dead, and things that have never been alive. LT2b Identify that most living things live in habitats to which they are suited. LT2c Describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other. LT2d Identify and name a variety of plants and animals in their habitats, including micro-habitats. LT2e Describe how animals obtain their food from plants and other animals. LT2f Understand a simple food chain, and identify and name different sources of food.		LT4a Recognise that living things (including those in the locality) can be grouped in a variety of ways. LT4b Explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment. LT4c Recognise that environments can change and that this can sometimes pose dangers to living things.	LT5a Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird. LT5b Describe the life process of reproduction in some plants and animals. LT5c Raise questions about their local environment throughout the year. LT5d Find out about the work of naturalists and animal behaviourists, for example, David Attenborough and Jane Goodall. LT5e Find out about different types of reproduction, including sexual and asexual reproduction in plants, and sexual reproduction in animals.	LT6a Describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro-organisms, plants and animals. LT6b Give reasons for classifying plants and animals based on specific characteristics. LT6c Know that broad groupings, such as micro-organisms, plants and animals can be subdivided. LT6d Classify animals into commonly found invertebrates (such as insects, spiders, snails, worms) and vertebrates (fish, amphibians, reptiles, birds and mammals). LT6e Find out about significance of the work of scientists such as Carl Linnaeus, a pioneer of classification.
	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Plants	P1a Identify and name a variety of common wild and garden plants, including deciduous and evergreen trees. P1b Identify and describe the basic structure of a variety of common flowering plants, including trees.	P2a Observe and describe how seeds and bulbs grow into mature plants. P2b Find out and describe how plants need water, light and a suitable temperature to grow and stay healthy.	P3a Identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers. P3b Explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant. P3c Investigate the way in which water is transported within plants. P3d Explore the part that flowers play in the life cycle of flowering			

			plants, including pollination, seed formation and seed dispersal. P3e Know that plants make their own food.			
	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Seasonal Changes	SC1a Observe changes across the four seasons SC1b Observe and describe weather associated with the seasons and how day length varies.					
	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Evolution & Inheritance						E16a Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago. E16b Recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents. E16c Identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution. E16d Be introduced to the idea that characteristics are passed from parents to their offspring. E16e Appreciate that variation in offspring over time can make animals more or less able to survive in particular environments, for example, by exploring how giraffes' necks got longer.

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Materials	M1a Distinguish between an object and the material from which it is made. M1b Identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock. M1c Describe the simple physical properties of a variety of everyday materials. M1d Compare and group together a variety of everyday materials on the basis of their simple physical properties.	M2a Identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses M2b Find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching.			M5a Compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency and response to magnets. M5b Know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution. M5c Use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating. Give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic. M5d Demonstrate that dissolving, mixing and changes of state are reversible changes. M5e Explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda. M5f Explore reversible changes, including, evaporating, filtering, sieving, melting and dissolving, recognising that melting and dissolving are different processes. M5g Explore changes that are difficult to reverse, for example, burning, rusting and other reactions, for example, vinegar with bicarbonate of soda.	
	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6

Electricity				E4a Identify common appliances that run on electricity. E4b Construct a simple series circuit, identifying/naming its basic parts, including cell, wire, bulb, switch and buzzer. E4c Use their circuits to create simple devices. E4d Draw the circuit as a pictorial representation (not necessarily using conventional circuit symbols). E4e About precautions for working safely with electricity. E4f Identify whether or not a lamp will light in a simple series circuit. E4g Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit. E4h Recognise some common conductors and insulators, and associate metals with being good conductors.		E6a Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit. E6b Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches. E6c Use recognised symbols when representing a simple circuit in a diagram. E6d Construct simple series circuits, to help them to answer questions about what happens when they try different components, for example, switches, bulbs, buzzers and motors. E6e Learn how to represent a simple circuit in a diagram using recognised symbols.
	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Forces & Magnets			FM3a Compare how things move on different surfaces. FM3b Notice that some forces need contact between two objects, but magnetic forces can act at a distance. FM3c Observe how magnets attract or repel each other and attract some materials and not others. FM3d Compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials. FM3e Describe magnets as having two poles. FM3f Predict whether two magnets will attract or repel each		FM5a Explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object FM5b Identify the effects of air resistance, water resistance and friction, that act between moving surfaces. FM5c Recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect. FM5d Explore the effects of air resistance by observing how different objects such as parachutes and sycamore seeds fall. FM5e Explore the effects of friction on movement and find	

			other, depending on which poles are facing.		out how it slows or stops moving objects. FM5f Find out how scientists, for example, Galileo Galilei and Isaac Newton helped to develop the theory of gravitation.	
	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Light			L3a Recognise that they need light in order to see things and that dark is the absence of light. L3b Notice that light is reflected from surfaces. L3c Recognise that light from the sun can be dangerous and that there are ways to protect their eyes. L3d Recognise that shadows are formed when the light from a light source is blocked by a solid object. L3e Find patterns in the way that the size of shadows change.			L6a Recognise that light appears to travel in straight lines. L6b Use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye L6c Explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes. L6d Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them. L6e Work scientifically by: deciding where to place rear-view mirrors on cars; designing and making a periscope and using the idea that light appears to travel in straight lines to explain how it works. L6f Look at a range of phenomena including rainbows, colours on soap bubbles, objects looking bent in water and coloured filters (they do not need to explain why these phenomena occur).
	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Sound				S4a Identify how sounds are made, associating some of them with something vibrating. S4b Recognise that vibrations from sounds travel through a medium to the ear. S4c Find patterns between the pitch of a sound and features of the object that produced it.		

				S4d Find patterns between the volume of a sound and the strength of the vibrations that produced it. S4e Recognise that sounds get fainter as the distance from the sound source increases.		
	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Rocks			R3a Compare and group together different kinds of rocks (including those in the locality) on the basis of appearance and simple physical properties. R3b Describe in simple terms how fossils are formed when things that have lived are trapped within rock Recognise that soils are made from rocks and organic matter.			
	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Earth in Space					ES5a Describe the movement of the Earth, and other planets, relative to the Sun in the solar system. ES5b Describe the movement of the Moon relative to the Earth. ES5c Describe the Sun, Earth and Moon as approximately spherical bodies. ES5d Use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky. ES5e Learn that the Sun is a star at the centre of our solar system and that it has eight planets: Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune (Pluto was reclassified as a 'dwarf planet' in 2006). ES5f Understand that a moon is a celestial body that orbits a planet (Earth has one moon; Jupiter has four large moons and numerous smaller ones).	

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
States of matter				SM4a Explore a variety of everyday materials and develop simple descriptions of the states of matter. SM4b Compare and group materials together, according to whether they are solids, liquids or gases. SM4c Observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C). SM4d Identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature.
