

Berridge Home Learning Challenges

Imagine that two animals of your choice (e.g. a crocodile and a polar bear) were able to have offspring. Using your knowledge of inheritance, draw what you think it might look like.

* Create the offspring in the form of a drawing

** Create and annotate the drawing explaining which parent each characteristic is from.

*** Research: Who was Charles Darwin? What was he famous for? Explain what he discovered with regard to evolution and inheritance.
