

Summer term 1. Year 1-Home learning challenges

What is it like to live in a hot country?

Build a cool house. Use boxes, lego or draw. Make sure it has shade. Eg a roof, maybe umbrellas. How do we stop the heat getting the windows?

Research Choose a hot country eg Sudan, Pakistan or Australia. Find out about the people and animals in that country. How do they keep cool on a hot day? What do they wear, eat? Where do they live?

Draw a poster to show what you find out.

Investigate Put some ice in a fridge and some more ice in a hot place (outside on a hot day or by a radiator.) Look at the ice every 5 to 10 minutes. Which ice melts faster? Draw or write what happens.
