

The White Rose Maths 'Schemes of Learning'

At Berridge we use the White Rose Scheme of Learning as a framework for maths teaching. We may adapt the scheme to suit our learners and provide additional resources so children experience a wide range of maths learning.

"The only way to learn mathematics is to do mathematics."

Paul Halmos

Blocks of learning

For each year group, the scheme of learning includes an overview of the maths that your child should be learning at any point in the year.

Each year is split into three terms (autumn, spring and summer), and each term comprises individual blocks of learning about a particular topic. You'll notice that we spend lots of time building strong number skills. These essential core skills lay a solid foundation for more complicated learning later on.

The small steps

The scheme divides each block of knowledge into a series of small learning steps. Together, these small steps cover all the curriculum content that your child needs to know.

Brain science tells us that your child will remember more by learning maths in small, related chunks. We also used the best available research to map out the crucial learning steps that will help your child to understand what they are learning clearly.

Helping your child with maths (it's more fun than you think!)

Many people think they "can't do maths", but with exciting new teaching approaches, we're proving day by day that every child really can love and succeed in maths! There are booklets to complete at home and more information on the White Rose website if you want help your child further
